Personal Profile

Education

•Bachelor of Engineering in AI: Systems & Technology *Sept 2021 - July 2025*

The Chinese University of Hong Kong CGPA: 3.637

- Dean's List 2021-2022 2023-2024
- ELITE Stream Scholarship 2022-2023 2024-2025
- Relevant Coursework: Fundamentals of Machine Learning, Introduction to Computer Systems, Introduction to NLP, Foundations of Optimization, Foundation of Applied Deep Learning, Data Comm & Computer Networks

Personal Projects

•LMMs for Software *Apr. 2024 - present*

A comprehensive evaluation framework on current LMMs' capabilities to help with software development.

- Investigated multimodal-related papers within seven years of those that can benefit from LMMs and accordingly formulated a task tree that integrates all potential tasks.
- Building an evaluation framework that constructs several LMMs, typical datasets, and corresponding tasks' evaluation metrics.

•LLM Safety *Jul. 2022 - Aug. 2023*

Consist of three projects focusing on safety evaluation frameworks: DUO & OASIS & Multilingual Safety.

- DUO: Developed a general, effective methodology and tool for testing multimedia content moderation software. Successfully attacked 7 popular software through 1,200 pieces of data, measurably indicating their weaknesses in multimedia content moderation.
- Multilingual Safety: Built a multilingual safety benchmark consisting of 10 different languages and 11 tasks. Demonstrated that LLMs potentially exist in different biases between languages with different security audit strengths.

Experience

•Research Collaboration *Jun - Aug 2023*

Tencent AI Lab, Shenzhen, China Online

- Supervisor: Dr. Zhaopeng Tu
- Built a multilingual safety benchmark containing more than 26,000 pieces of data and 10 different languages for testing large language models' multilingual safety ability.

•UG Summer Research Internship *Jun - Aug 2024*

The Chinese University of Hong Kong, Hong Kong Offline

- Supervisor: Prof. Michael Rung Tsong Lyu
- Proposed an automatic tool to detect audio and video inconsistencies in software, which utilized LMMs and LLMs to extract information and analysis.

Publications

* equal contribution

•Probing Multimodal Large Language Models on Cognitive Biases in Chinese Short-Video Misinformation

Huang, Jen-tse *, Chang Chen *, Shiyang Lai, Wenxuan Wang, Michelle R Kaufman, and Mark Dredze

Findings of the Association for Computational Linguistics (ACL), 2026

•All languages matter: On the multilingual safety of LLMs

Wang, Wenxuan, Zhaopeng Tu, Chang Chen, Youliang Yuan, Jen-tse Huang, Wenxiang Jiao, and Michael Lyu

Findings of the Association for Computational Linguistics (ACL), 2024

•Validating Multimedia Content Moderation Software via Semantic Fusion

Wang, Wenxuan, Jingyuan Huang, Chang Chen, Jiazhen Gu, Jianping Zhang, Weibin Wu, Pinjia He, and Michael Lyu

Proceedings of the 32nd ACM SIGSOFT International Symposium on Software Testing and Analysis (ISSTA), 2023

•An Image is Worth a Thousand Toxic Words: A Metamorphic Testing Framework for Content Moderation Software

Wang, Wenxuan, Jingyuan Huang, Jen-tse Huang, Chang Chen, Jiazhen Gu, Pinjia He, and Michael R Lyu

2023 38th IEEE/ACM International Conference on Automated Software Engineering (ASE), 2023
